Art Unit: 1646

Claims 1 to 25 are pending in the instant application.

For restriction purposes, claims 16 to 18, 20 and 25 have been treated as if they depend from claim 15, since there is no basis for "said modified arrestin" in claim 14.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 6 to 13, and 15 to 25, drawn to a DNA molecule encoding a modified hybrid arrestin and methods of use, classified in class 435, subclass 7.2.
- II. Claims 2 to 5 and 14, drawn to a DNA molecule encoding a modified hybrid G protein-coupled receptor and methods of use, classified in class 435, subclass 7.2.

The modified hybrid arrestin encoded by the DNA of invention I and the modified hybrid G protein-coupled receptor encoded by the DNA of invention II are structurally unrelated proteins each of which can be made and used without the other. Lack of unity is shown by the fact that these two compounds lack a common utility which is based upon a shared structural feature lacking from the prior art and disclosed as a basis for that common utility.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1646

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
